

EnTERPRIZE.EM™ - for NGER Compliance

EnTERPRIZE.EM™ / NGER

THE CHALLENGES

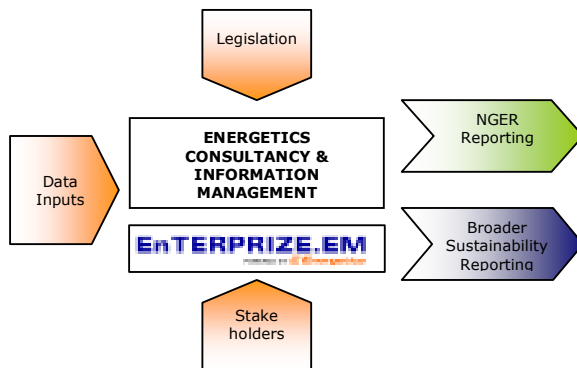

The National Greenhouse and Energy Reporting Act (NGER) is the world's first mandatory energy/carbon reporting scheme. Businesses are now faced with the challenge of implementing and complying with this very complex law. They need to deal with issues that include:

1. Gathering, defining and reporting their energy/emission sources
2. Defining boundaries and operational control of sites/facilities
3. Calculating emissions using Method 1 factors and higher order methods where required
4. Ongoing data collection in a cost effective and timely manner
5. Embedding robust collection procedures into business practices
6. Developing/maintaining staff skills, systems and tools
7. Managing compliance risk – sources, materiality, accuracy, transparency, records
8. Minimising the cost of compliance

For most businesses, sourcing the data required for NGER is not an easy exercise, and there is a risk this task will be delayed until just before the compliance deadline. This can lead to stress from tight deadlines and lack of resources, uncertainty around accuracy and completeness of the data and reduced confidence in the data complying with the law.

ENTERPRIZE.EM™ – A SUSTAINABLE SOLUTION

The NGER regulations require robust, ongoing data collection and reporting systems. EnTERPRIZE.EM™ is Energetics' online sustainability reporting solution and is ideally suited to meet your NGER requirements.

Our EnTERPRIZE.EM™ solution to NGER includes:

- Working with your organisation to identify all the data sources
- Working with your organisation to embed data collection within existing processes
- Capturing your data and providing support via Energetics' Information Management team
- Accessing your online report via EnTERPRIZE.EM™ portal
- Automatic updating of your carbon footprint with the most current emissions factors
- The guidance, support and advice of our expert consulting team

BENEFITS OF THE ENTERPRIZE.EM™ SOLUTION

- Corporate visibility – quickly report trends and identify issues
- Single corporate platform – industrial strength, scalable
- Efficient collection utilising specialist resources and economies of scale
- Automated data upload to remove manual data handling
- Online reporting available 24/7 anywhere via internet
- EnTERPRIZE.EM™ is hosted and managed by Energetics

ENERGETICS' INFORMATION MANAGEMENT

From our experience, the key to any successful reporting tool is the consistency, completeness and accuracy of input data. Energetics has been assisting businesses with information management for over 8 years. Our dedicated team of 25 currently processes 125,000 transactions p.a. worth over \$0.5 billion.

For any further information please contact Rob Sims, Principal Consultant; Information and Data Management on 02 9492 9511 or simsr@energetics.com.au
